

About the Gleaner High Inertia Enclosed Rotor

- High inertia, enclosed design eliminates trash build-up & plugging
- Optional boronization of bars for longer life
- Runs at a lower RPM to reduce fuel consumption
- Staggered bar design for optimal material flow, reducing the impact on the concave

GLEANER CONCAVE S77 MODELS

- All Crop Design, no need to change concaves
- Inserts are reversible and replaceable
- Boronized Max Thresh insert for longer wear
