JOHN DEERE PRODUCT LINE UP

S & STS SERIES INSERTS

CONVENTIONAL 9600 SERIES

- Heavy duty steel frame eliminates bowing
- Stainless steel replaceable wear edges for longer life

S & STS SEPARATOR GRATE

- Heavy-duty design with an all steel construction
- Modules contain 6 replaceable inserts
- Four grates are required for a complete set

X9 CONCAVE INSERTS

GEN 2 HIGH INERTIA ENCLOSED CYLINDER

- High Inertia, fully enclosed design eliminates trash build-up and plugging
- Runs at a lower RPM reducing fuel consumption
- Optional boronization of bars for longer life
- Staggered bar design for optimal material flow, reducing the impact on the concave

CHOPPER BLADES

- Stay Sharp Design
- Extended Life
- Tungsten Carbide Lasering

TINE PADDLE BEATER

- Provides more crop agitation and fluffing of material for better separation
- Increased mass to utilize inertia, reducing fuel consumption
- Minimized crop compression
- Eliminates trash buildup and plugging
- Paddles are reversible and replaceable
- Boronized paddles for longer wear

S & STS SERIES AND X9 INSERTS

- Replaceable and reversible
- Boronized Max Thresh for longer wear
- Customizable

**BETTER THRESHING, BETTER SEPARATION, BETTER SAMPLES
