ALL CROP SET-UP

HARD THRESH SET-UP

MASSEY 9500 ALL CROP

SBM0910 PARTS BREAKDOWN

First Position

Max thresh regular with helical bars and slightly larger holes that the boron max thresh, allowing partial separation. Insert is reversible as the helical bars wear allowing double the life of the insert.

SBM0900BB

Second Position

Standard thresh (description below) & Max thresh regular with helical bars and slightly larger holes that the boron max thresh, allowing partial separation. Insert is reversible as the helical bars wear allowing double the life of the insert.

SBM0900C

SBM0900B

Third Position

The Standard Thresh insert provides threshing, but it is less aggressive than our helical bar style. Standard Thresh Insert is designed to balance threshing and separating and is typically used in the middle of a concave set to transition materials or where a less aggressive thresh is desired. Individually replaceable.

SBM0900C

Fourth Position

Round bar insert (description below) & the Standard thresh insert (description above).

SBM0900D

SBM0900C

Fifth Position

The Round bar insert is mainly a separating insert although it does offer a minimal amount of threshing action. More rows of this style would be used in a setup for corn or crops requiring minimal threshing.

SBM0900D

Sixth Position

The Round bar insert is mainly a separating insert although it does offer a minimal amount of threshing action. More rows of this style would be used in a setup for corn or crops requiring minimal threshing.

SBM0900D

**Single Frame without inserts
